

S.N.D.T Women's University

Revised Syllabus

For

Bachelor of Science (Zoology)

Suggestions and Comments:

1. This very balance syllabus has covered all aspects of Zoology including traditional, classical, applied and modern aspects of zoology.
2. Animal diversity practical's should be divided phylum wise.
3. Along with Immunology some units of molecular biology should be their or one more separate unit as Molecular biology can be included.
4. Skill Enhancement courses should have practical's as learner will get actual hands on training of particular skill.
5. Research Methodology will definitely enhance the interest and the knowledge of learners regarding the research.
6. Number of lectures allotted in each course are not uniform. Also the number of units in Core, DSE or SEC are nor uniform.
7. In SEC Food and Nutrition, Vermiculture and Fish processing and preservation can be included as these courses are region and the need based.
8. If possible, Learner's Space should be given at the end of each course that will help to the learners to get extra knowledge beyond the text related to the topic. That will nurture the interest of the learners in the subject of Zoology.
9. If possible, in DSE courses Wild life conservation, Ecology and Environment options could be included as they are the part of zoology.
10. Number of practical for each course should be uniform will help for the allocation of marks during examination.
11. Theory as well as practical exam pattern should be included in the syllabus.
